Filipe Teixeira Amaral

Senior Software Engineer

Brazil · +55 48 99623-2663 · filipetamaral@gmail.com · linkedin.com/in/itisfilipe · github.com/itisfilipe

SUMMARY

Full-stack engineer with 12 years building SaaS in healthcare, fintech, and insurance: GraphQL and REST APIs, compliance-critical systems, React frontends, and data-intensive pipelines.

Solo founder of Trader Leap, a trading journal SaaS taken to public beta with coding agents: domain-specific reviewer agents, cross-model verification, and a review gate on every commit, shipping 12 releases in six months.

SKILLS

AI Engineering: Claude Code, Codex, multi-agent review workflows, subagent design, cross-model verification, context engineering, retrieval-backed knowledge bases, agent hooks and gates, spec-driven development
Languages and Backend: Python, TypeScript, JavaScript, SQL, Django, FastAPI, Flask, NestJS, GraphQL, REST, Celery
Frontend: React, Next.js, Vue.js, Tailwind CSS
Data and Infrastructure: PostgreSQL, MySQL, Redis, DynamoDB, Supabase, AWS, Terraform, Docker, Vercel, CI/CD
Healthcare Interoperability: HL7, FHIR, SMART on FHIR, C-CDA, QRDA, MIPS/eCQM, ONC certification

EXPERIENCE

DrChrono — *Senior Software Engineer* · Full-time · Remote — August 2021 - Present · 5 yrs 3 mos

- Built clinical quality measure calculation and QRDA I/III export, implementing 10 CMS eCQMs across 2022-2026
- Led ONC HTI-1 and USCDI v3 compliance for an EHR certified against 40 criteria and 12 CQMs (Drummond)
- Owned C-CDA and EHI bulk export for five years at 99.7% completion: race conditions, memory pressure, P0 response
- Delivered SureScripts e-prescribing: formulary and benefits, medication history, eligibility, controlled substances
- Built Care Plan and SMART on FHIR management: TypeScript/React, GraphQL schema, JWT issuance, audit logging
- Cut C-CDA generation queries 37% with a thread-local prefetch cache that every existing call site inherited

Trader Leap — *Founder and Solo Engineer* · Remote — February 2026 - Present · 9 mos

- Built and shipped a trading journal SaaS to public beta, solo, with Claude Code and Codex: 12 releases in six months
- Agent output treated as untrusted: five domain reviewers and a Claude/Codex cross-review, blocking at commit until they run
- Agents work from a maintained architecture and decision wiki, so reviews run against current invariants

BriteCore — *Lead / Senior Software Engineer* · Full-time · Remote — August 2017 - June 2021 · 3 yrs 11 mos

- Led a team of 4 engineers to integrate a new insurance client, resulting in $2M+ in premium sold to 500+ customers
- Developed serverless authentication service (Lambda, Cognito) with SSO and MFA for 50+ insurance companies
- Replaced legacy system with modular microservices using Python, Django, Flask, and Vue.js on AWS
- Performed code reviews, mentored engineers, and translated client requirements into technical specifications

localhost.company — *Frontend Engineer* · Full-time · Remote — June 2016 - July 2017 · 1 yr 2 mos

Universidade Federal de São João del-Rei — *Software Engineer* · Part-time · On-site — April 2014 - June 2016 · 2 yrs 3 mos

FREELANCE & CONTRACT EXPERIENCE

Client engagements delivered alongside the full-time role above.

- **Advis · via DevStride** (November 2025 - February 2026 · 4 mos): Wealth management platform in NestJS, Next.js, and TypeScript; type-safe API client with OpenAPI and TanStack Query
- **RxPartner · via Surton** (August 2024 - March 2025 · 8 mos): FastAPI pricing backend for a PBM platform, integrating Optum, RxLogic, Cervey, and MedOne; DynamoDB caching on Terraform-managed AWS
- **Tomorrow Health** (December 2023 - June 2024 · 7 mos): Prior Authorization system end-to-end: GraphQL/Django backend, React frontend, Medicaid form integration
- **Rise Financial** (July 2022 - November 2022 · 5 mos): Django backend restructured with Very Good Security integration for PCI compliance

EDUCATION

Universidade Federal de São João del-Rei — *Bachelor of Science, Computer Science* — 2012 - 2016
